

# Survey of LT Tools

by Ron Lockwood

Technology & Publishing Team Leader,

Language Technology Consultant

SIL International

Updated by Kent Schroeder

SIL ALAfrica LT Team Leader

# Lost in the Software

- Ever heard these questions/statements?
  - What's the Name of that Tool for X?
  - I wish we had a tool that would do X!
  - I wish there was a tutorial for X!
- Today is your day to learn more about what is available
- Emphasis on SIL tools

# Where to Find Stuff

- New catalog of SIL software:  
[software.sil.org/products](http://software.sil.org/products)
- Somewhat independent software listing with some ratings/reviews:  
[lingtransoft.info](http://lingtransoft.info)
- Tutorials and training materials:  
[lingtran.net](http://lingtran.net)

# What's New?

- Language Forge – online dictionary editing 
- Glyssen – produce high-quality dramatized Scripture recordings 
- HearThis – do-it-yourself Bible recording 
- Reading App Builder – make apps containing picture books 

# Language Forge – online dictionary editing

# Glyssen – dramatized Scripture recordings

- It quickly identifies all the direct speech in the text and the biblical character who speaks each part.
- Then it walks you through the process of selecting a cast and assigning roles to the voice actors.
- Finally, it prepares a complete set of scripts to use in the recording process.

Who speaks this part?

Reference	Character	Delivery	Vernacular Text
JHN 1:37...	narrator (JHN)		{37} آ دوین مُریدان اے ہر اشکت و ایسائے زندہ رٹوان بوتنت. {38} ایسایا چک ترینت و ہر دوینی دیستنت کہ آییے زندہ آگیا آنت.
JHN 1:38	Jesus	questioning	«شما چے لوئیئت؟»
JHN 1:38	narrator (JHN)		آبان گوشت:
JHN 1:38			«رتی!»
JHN 1:38			(ہزان: او استاد!)
JHN 1:38			تیبی جاگہ کجا انت؟»

Character

- narrator (JHN)
- Jesus
- disciples of John Baptist, two (Andrew and another)

# HearThis – Bible recording

A screenshot of the HearThis Bible recording application. The interface is dark-themed and shows a recording progress bar at the top. Below the progress bar, the text 'Mark' and 'Chapter 3' are displayed. A 'Line 3' indicator shows the current recording position, with a progress bar below it. The main text area contains the following text: 'Amala hamosa nebegi, Felesi dolö nefolalo amolia bealahilä Yesuma sähalea, Nifile mala säla negei dibe ameadada segeyo Sabada gafegi made hamolo negei amo die bögëla aulo golia damula hamosa nebego bimola säi.' To the right of the text are playback controls: a play button, a stop button, and a next button. At the bottom left, there is a small 'A' icon, and at the bottom right, there is a heart icon.

# Reading App Builder

## Make picture book apps

# New in FLEx & Paratext

## **FLEx 8.3.x**

- One-button upload to Webonary
- New version of the Configure Dictionary functionality
- Ability to export a dictionary configurations
- New hybrid dictionary view
- [More here](#)

## **Paratext 8.0**

- New registration system
- New Send/Receive server – requires migration
- Project progress tracking
- Resources
- [More here](#)

# Translation

# Translation Drafting/Editing

- Paratext – Bible translation, checking, publishing 
- Bible Edit – Bible translation (any platform) 
- Render – oral drafting and checking (by FCBH) 
- TBA – computer-assisted Bible translation (from Greek/Hebrew)

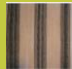

# Adaptation Tools

- AdaptIt – translate between related languages (translation memory) 
- Paratext – translate between related languages (via interlinear tool) 
- FLExTrans – translate between related languages (linguistic rules)

# Research Tools

- Paratext – research Biblical language texts 
- TW Logos – a collection of Biblical resources chosen specially for Bible Translators by SIL 

# Scripture Publishing

- Map Creator – create language-specific maps, charts and diagrams 
- Publishing Assistant – supports the typesetter in completing the tasks required to publish a Paratext USFM text 
- Asheninka – explores different algorithms for parsing orthographic words into syllables 

# Scripture Testing

- Transcelerator – a Paratext plugin that adds a feature to help with comprehension checking 
- Scripture Forge – a web tool to facilitate online community Scripture checking (employs some crowd-sourcing methods) 

# Linguistics

# Dictionary

- FLEx – Enables linguists to be highly productive when building a lexicon and interlinearizing texts. 
- WeSay – Helps non-linguists build a dictionary in their own language. 
- Language Forge – online dictionary editing (editing roles, comments) 

# Dictionary (cont)

- Dictionary App Builder – Helps you to build customized dictionary apps for Android devices. 
- Webonary – Gives language groups the ability to publish bilingual or multilingual dictionaries on the web 

# Language Documentation

- ELAN – create complex annotations on video and audio resources 
- SayMore – make common Language Documentation tasks easy, keep the data organized and stay productive (basic transcription) 
- FLEx – enables linguists to be highly productive when building a lexicon and interlinearizing texts 

# Linguistic Analysis

- FLEx – enables linguists to be highly productive when building a lexicon and interlinearizing texts 
- PAWS Starter Kit – a smart questionnaire that produces a draft of a grammar write-up based on the user's responses 
- Phonology Assistant – discover and test the rules of sound in a language. 

# Other Domains

# Anthropology

- SILKIN – analyze and document the kinship structure and terminology used in a language 
- FLEx (Data Notebook) – manage data for cultural field work. This tool facilitates documenting, categorizing, retrieving, analyzing, and summarizing conclusions about your fieldnotes. 

# Literacy

- Bloom – enables low-literacy language communities to author books 
- Reading App Builder – build customized story apps for phones & tablets 
- PrimerPro – assists literacy workers by making it simpler to develop primers 
- SynPhony – make literacy materials production easier by listing suitable words from a corpus to use in a lesson

# Scripture (Digital) Engagement

- Scripture App Builder – build customized Scripture apps for smart phones and tablets (text typically drawn from Paratext) 
- Bible Box – (wireless enabled device) provides users with a web interface to the shared files stored on the connected USB drive 

# Publishing & Archiving

- XlingPaper – author and archive linguistic papers or books using XML 
- REAP – preserve and distribute digital documents 
- RAMP – offline submission tool for REAP 

# Vernacular Media

- Glyssen – produce high-quality dramatized Scripture recordings 
- HearThis – do-it-yourself Bible recording 
- Photo Story – create slideshows using your digital photos

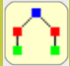

# Language Assessment

- COG – Helps you compare languages using lexicostatistics and comparative linguistics techniques. 
- WordSurv – Aids in the collection and analysis of word lists. 

# Language Learning

- FLEx – for storing words and sentences learned 
- ANKI (FlashGrab) – an Anki addon for pulling flashcard data from WeSay or FLEx (via LIFT export)

# Utilities

- PDF Droplet – create printable booklets of various kinds 
- SIL Converters (TECKit) – provides tools for transliterating texts 
- Keyman – a single keyboarding system that works on Windows, Mac OS X, iOS and Android 
- LingTree – describe a linguistic tree and create an image of it
