

3 Add a Leveled Reader to a Collection

Introduction

A *reader* is a book that is used for reading exercises.

A *level* is a rating. It reflects the difficulty to do a task, Here the task is to read.

A *Leveled Reader* is a book that is written to a particular level of difficulty.

In Bloom, the Leveled Reader Tool helps you to write a book for a desired level of difficulty. Bloom has default six levels. You can use them or change them.

This module will help you become familiar with the default levels. The Help documentation that is installed with Bloom help you learn how to make changes to these levels.

Prerequisites

You have completed module 1 and 2. So you are familiar with the steps to add a book to a collection.

Add a Leveled Reader to a Collection

When Bloom is first opened, you see only the  **Collections** tab. Look in the lower left pane in the Bloom window. There you see **Sources for New Books**. Below it, you see **Templates**, **Sample Shells** and **Books From BloomLibrary.org**.

To make a leveled reader, we need to use the **Leveled Reader** template.

1) Click the **Leveled Reader** template. It looks like this:

The template appears in the right pane.

2) Click the  **Make a book using the source** button.

Bloom makes a book from the template. It opens to the **Front Cover** page.

You can insert a picture and type words on the **Front Cover** page. This page and the other pages are the same as for a **Basic Book**. (Module _).

However, notice that there is a new pane on the right side. It is the **Leveled Reader Tool**.

Level 1 of 6

Word counts

This Page

	Max	Actual
per page	2	0
per sentence	2	0

This Book

	Max	Actual
total	20	0
per page	2	0
unique		0

- [Illustration support](#)
- [Choice of Topic](#)

More...

The top control (**Level 1 of 6**) shows the current level that this book is set to use, and the total number of levels that have been set up for use.

The **Word counts** area shows the maximum number of words permitted for the level and the actual number of words. These numbers change as you type words and change colors when a number in the **Actual** column becomes larger than the number in the **Max** column.

The **Set up Levels** link opens a dialog box where you can make changes to the levels. Refer to the Help documentation to learn more.

Keep in mind are links that open a document which give more information about levels.

3) Click the **Basic Text & Picture** template.

Insert a picture there, using the same steps as you did on the **Front Cover** page.

4) Click the text box that is below the picture.

For this exercise, let's keep the level set to Level 1. What that means is each sentence can have no more than two words. For example, suppose you inserted a picture of a cat, you could type "A cat."

5) Type a two-word sentence that describes the picture you chose.

Notice that the word counts updated to show the number of words you typed. Here is an example:

Basic Text & Picture

A cat.

Leveled Reader Tool

Level 1 of 6

Word counts

This Page		
	Max	Actual
per page	2	2
per sentence	2	2

This Book		
	Max	Actual
total	20	2
per page	2	2
unique		2

[Set up Levels](#)

Type another word or two in the same text box so that there are too many words.

Notice that various things appeared to warn you that you have too many words. Here is an example:

Basic Text & Picture

Leveled Reader Tool

Level 1 of 6

Word counts

This Page		
	Max	Actual
per page	2	3
per sentence	2	3

This Book		
	Max	Actual
total	20	3
per page	2	3
unique		3

[Set up Levels](#)

- The yellow border around the boxes warns you that there are too many words on the page.
- The sentence has a yellow background color. If you hold your mouse pointer over the sentence, a box appears with an explanation.
- Number in the **Actual** column turned yellow if they are more than their **Max** value.

In this example, you need to edit the sentence back to two words “A cat.”

Now you have a simple leveled reader.

Another module will discuss how to publish your book.

6) If you want to edit your reader or change a picture, simply click the **Edit** tab ().

Then find the page in the **Pages** pane that you want to change. Click that page and make the edits.

7) If you are curious, you can click the **Set up Levels** link. The **Set up Leveled Reader Tool** dialog box opens. The Help button opens a Help topic about this dialog box.
