Building a Bloom book app

How to build an app with a bloom book as its content.

Before you build the app, you need to already have your Bloom book prepared. See Bloom book pages for more information.

Once in the app, click "New App" at the top left corner of the program.

A new dialogue box will appear.

Nev App		×
App Rome Specify the app	rome	
App Name The main title of	The app, displayed under the app-con.	
Tips on choosing	an app name:	
 Keep the to of the name 	are aftert and sinple, e.g. "Manana Stories" rather than "Stories the Manara language". Otherwise some I will be cut off when displayed on the phone.	
	he name is dear and understand its speakers of the language.	
 Use moved r 	see, e.g. "Memara Staries" rather than all cape, "MMMARA STORIES".	
 App names first. 	off be digitized using the system fant on the device, so don't include characters that require a special

Select the books you want to add. I only have one in my library, but more than one at a time is possible. Then click next.

Continue following the steps of the wizard. When you have finished, you will have a new app with your book(s) already in the app.

You may now make any necessary adjustments or sychronize audio files. When you have finished personalizing the app, click "Build App".
