

## MLE4000 Word List for FLEx

In language development work, it is useful to have a wordlist to work with. One way to create a wordlist using the African Comparative Wordlist which would give about 1700 words. Another way to create a word list is to use the Rapid Word Collection which would give at least 10,000 words.

The MLE 400 Wordlist would give you at least 4000 words. It takes about a week or two to complete. This wordlist has been used to assist in the creation of primers and Multilingual Education (MLE) materials.

The MLE 4000 wordlist is a word list that contains over 5000 entries. Each entry has a part of speech, English gloss, French gloss, and at least one semantic domain entry. From these entries you should be able to create a word list of at least 4000 words.

The MLE word list is stored as a LIFT file. To download the LIFT file of the MLE 4000 wordlist, click [here](#).

To create a FLEx project using the MLE 4000 wordlist, do the following.
