Opening Logos

After you have installed "Logos Bible Software", it is ready for use.

There are two ways in which you can open the application.

Use the application icon on the computer screen.

The first way is to look for the application on your computer screen. The application looks like this:

       Double-click this application icon.

Look for the application in the "Start" menu.

The second way is to look for the application from the "Start" menu. Click on the "Start" menu in the lower-left corner of your computer screen. In the search box, start entering "Logos". In the resulting list, you will see the application, "Logos Bible Software". Click on "Logos Bible Software".
