Add a session

To add a new session to the current project, do the following steps:

- 1. Click the Sessions tab.
- 2. Click the appropriate button on the bottom left hand side according to the type of session:
 - 1. "New" Creates an empty session which can have the meta data added and files dragged or added to it.
 - 2. "New from Device" Opens a dialogue to add files from an SD card or recording device.
 - 3. "New from Recording" allows you to record directly into the session.
- 3. A new session is added. Enter session metadata.
- 4. As necessary, add files to the new session.
- 5. Enter or edit file metadata.
