

Adding BdT Menu to Logos 10

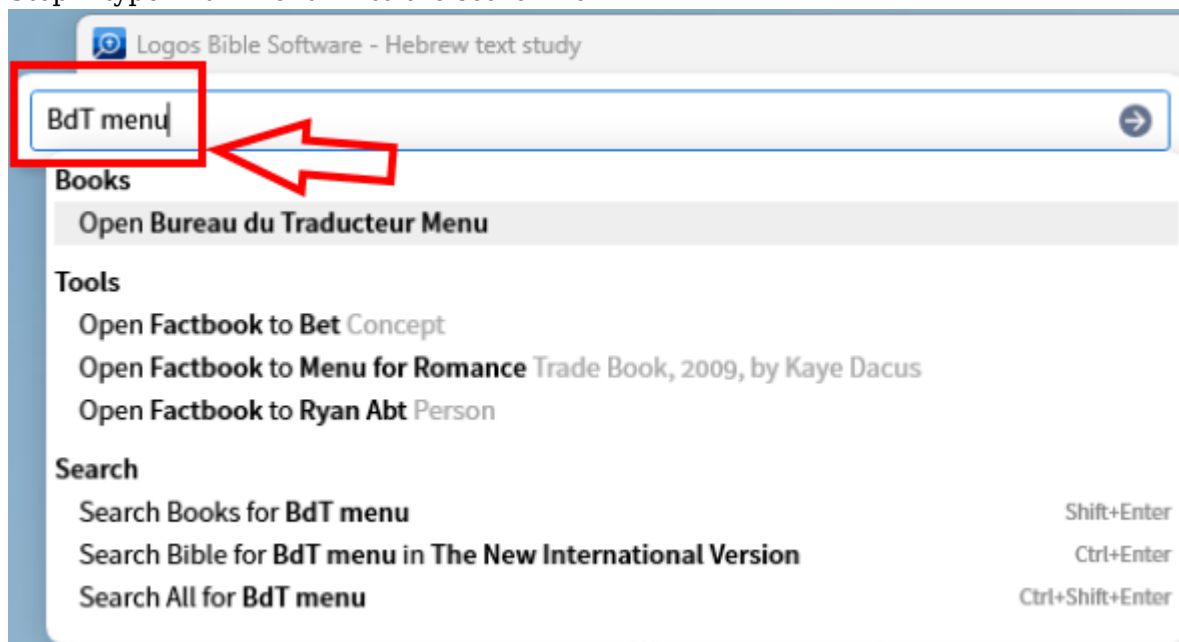

It is possible to add the old-style Folio Views library menu to Logos 10. This is helpful for those transitioning from Folio Views. It can also be helpful to anyone who just wants quick access to the Bureau du Traducteur, (BdT) collection of French resources.

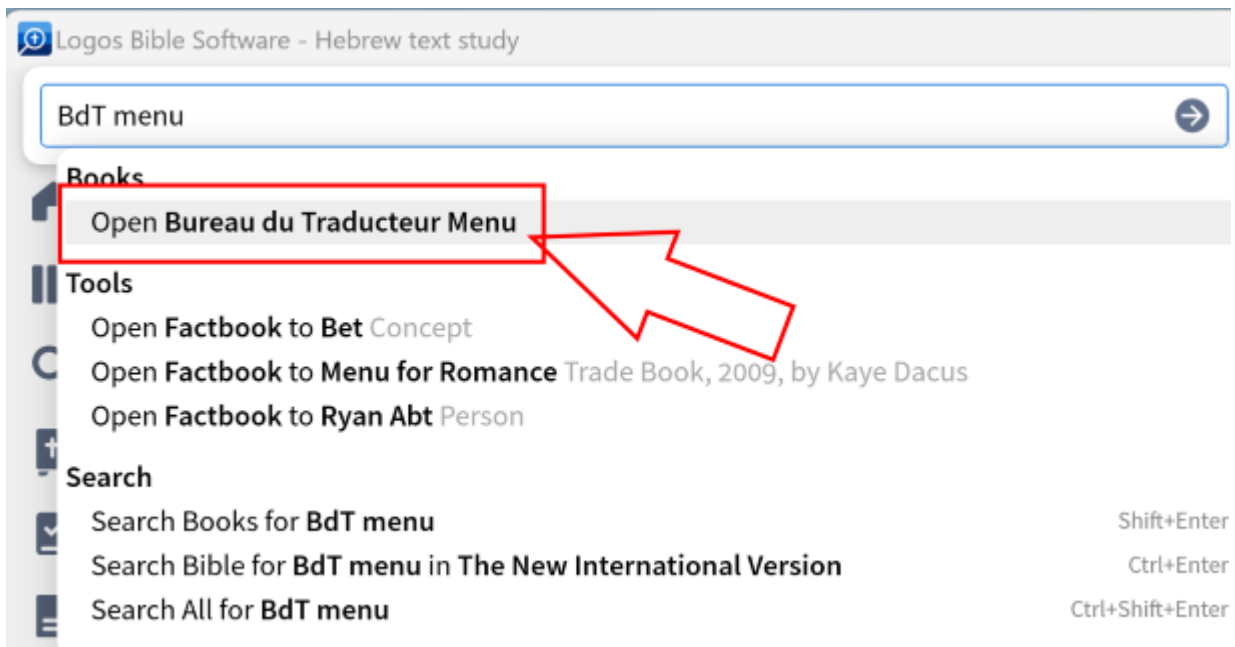

- Step 1 Locate the Logos search box

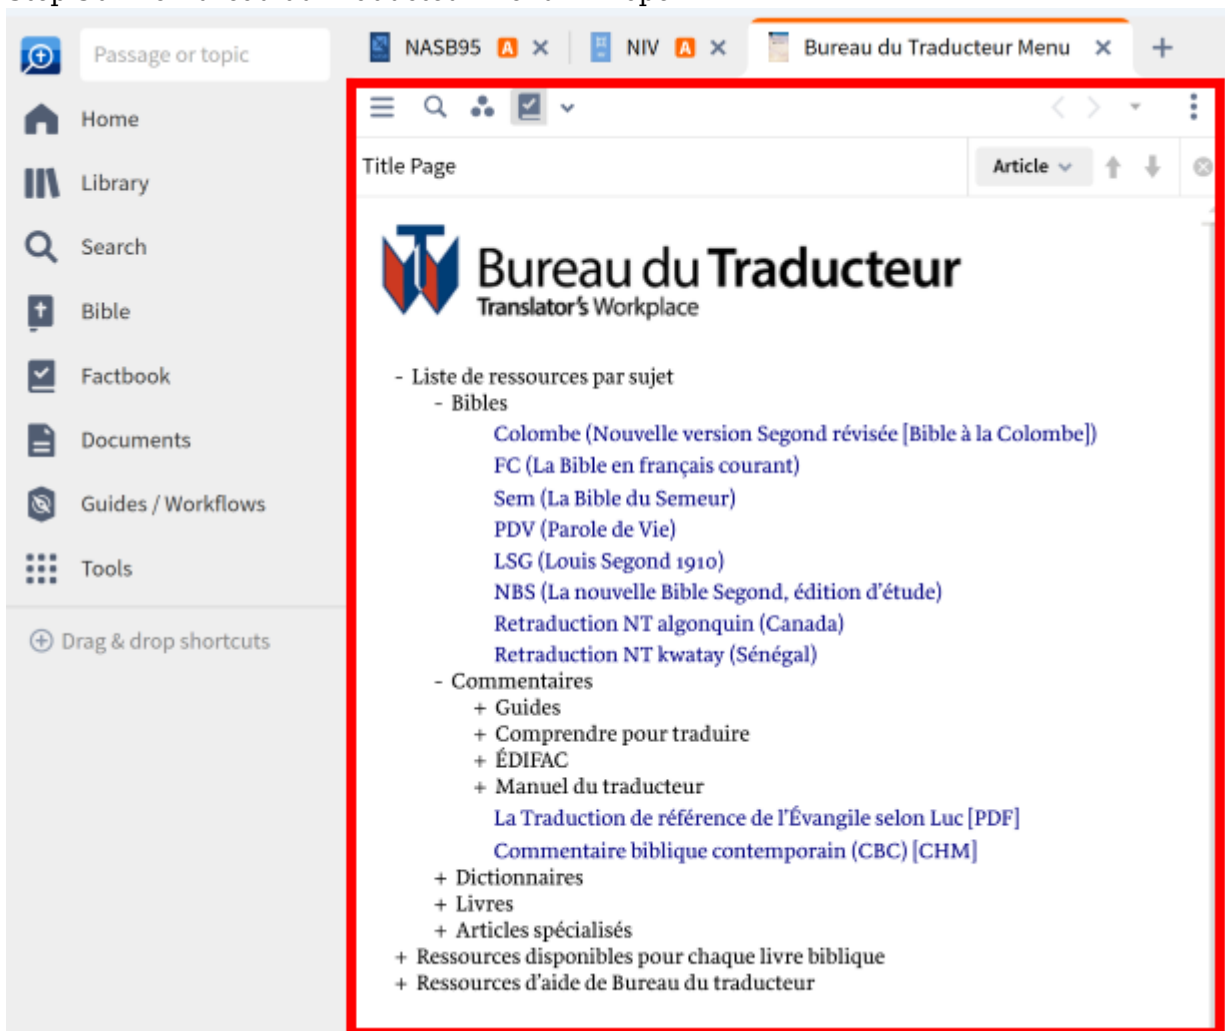

- Step 2 type “BdT Menu” into the search Box

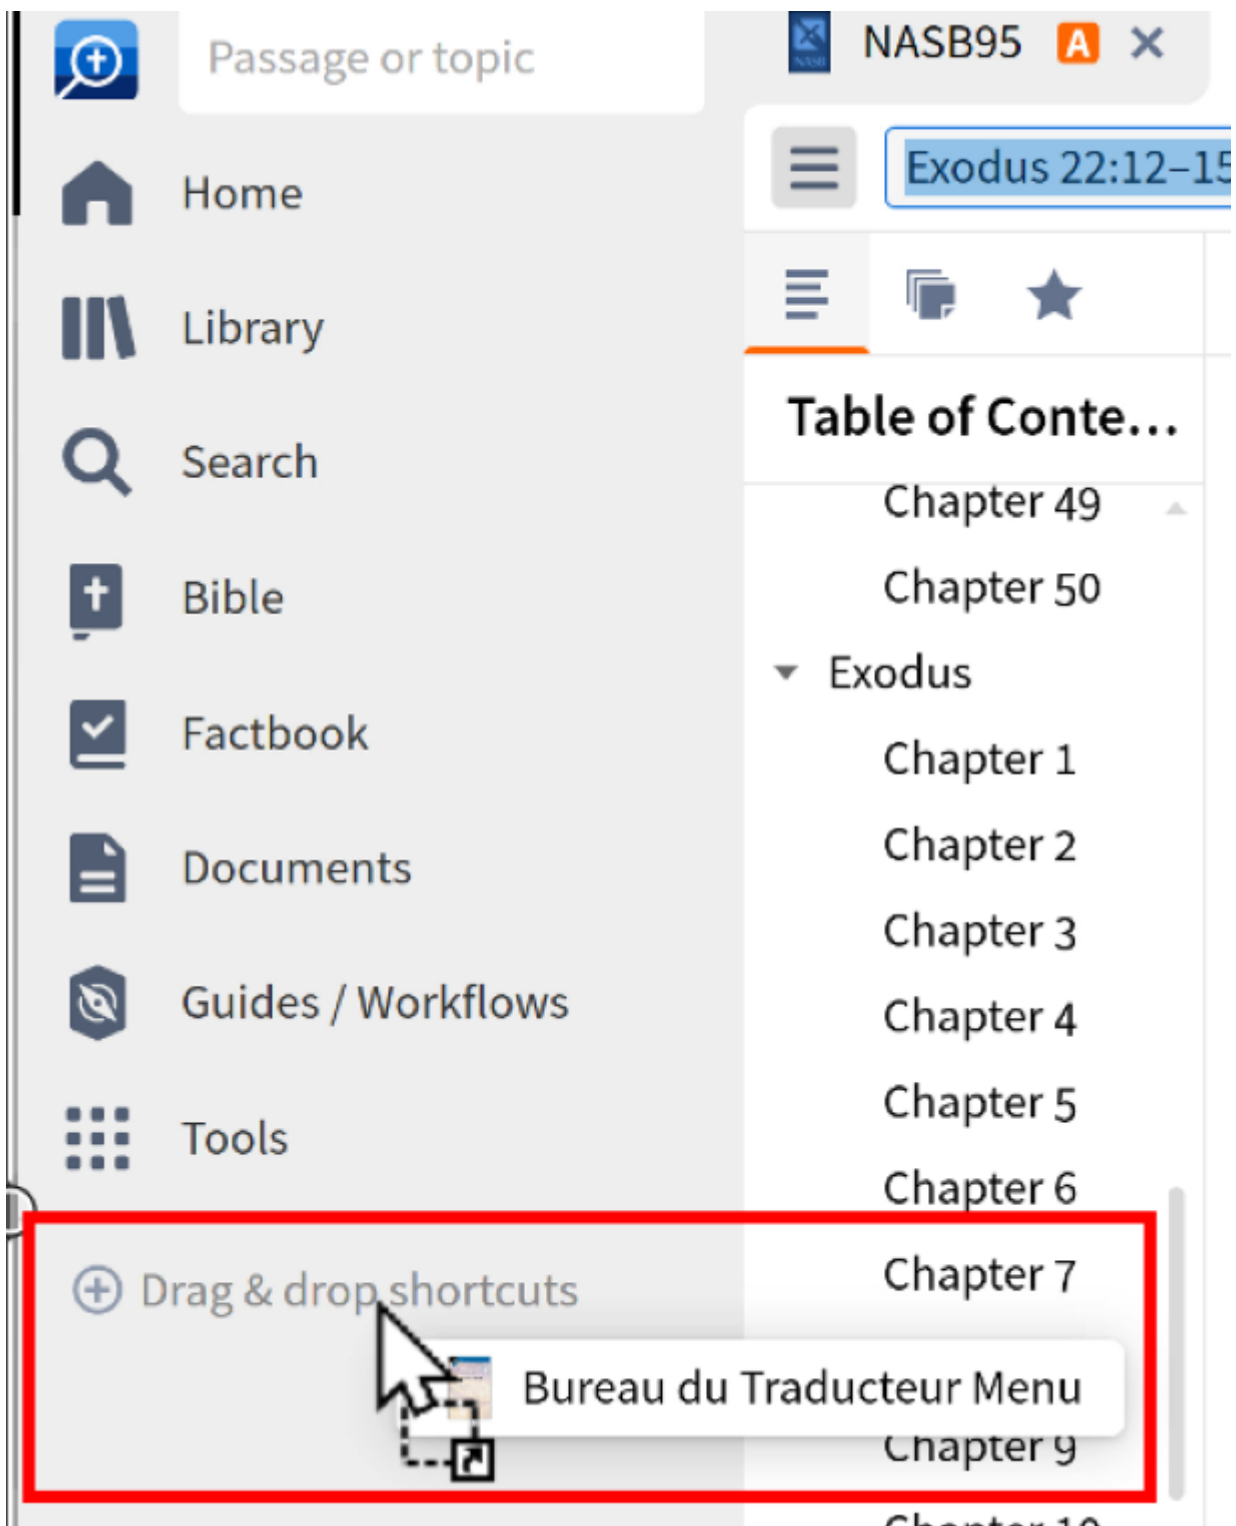

- Step3a Click on Open Translator’s Workplace Menu

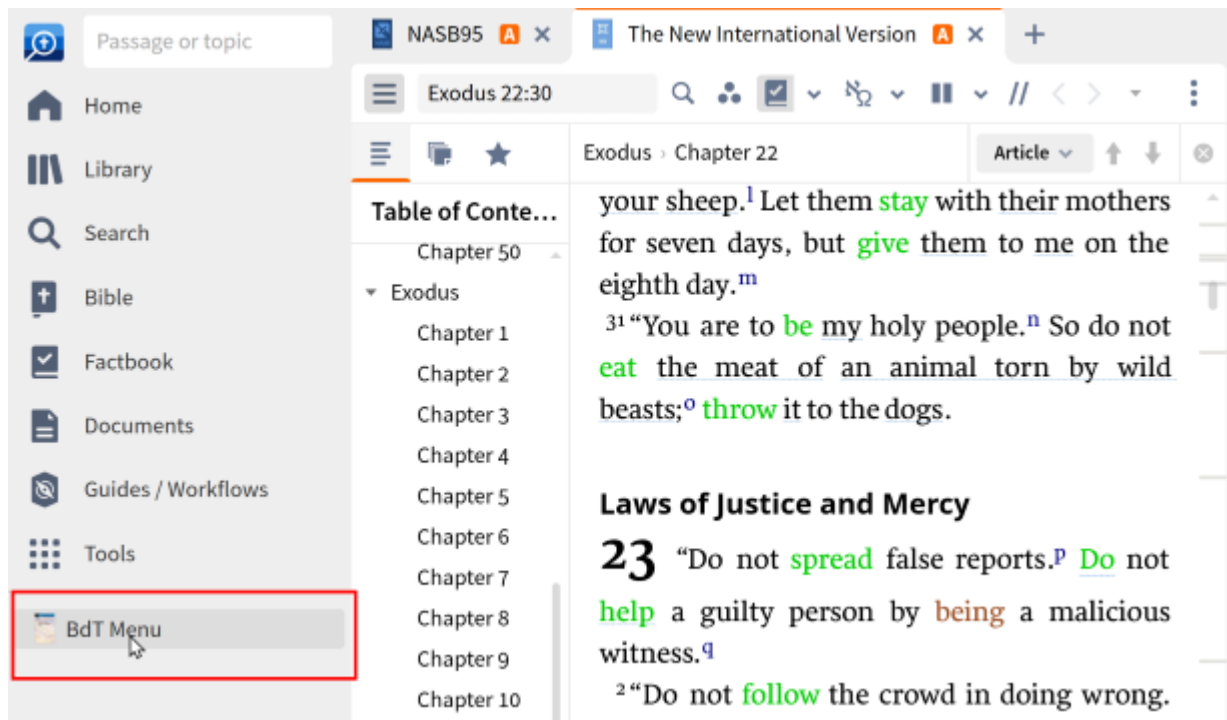

- Step 3b The Bureau du Traducteur menu will open

- Step 4 Click and drag the Bureau du Tracucteur Menu tab to menu side panel where it says Drag & drop shortcuts.

- Step 5 The BdT menu shortcut icon will be added to the Logos toolbar

□ Now you can open the BdT menu anytime you want by clicking on the BdT menu icon in the shortcut section of the Logos toolbar
