WeSay Administrator

WeSay Exercise

- 1. Create a new language project for a mother tongue translator.
- 2. Configure it using the Configuration Tool.
- 3. Add words to the word list, using the AFA Compare Word List, using Semantic Domains and using Browse & Domains Browse & Domains
- 4. Add example sentences to some of the words.
- 5. Export the word list you created to a SFM file. Show it to the instructor.
