

WeSay Overview

WeSay - Overview

WeSay helps non-linguists build a dictionary in their own language.

- WeSay is customizable and task-oriented.
- WeSay uses a standard xml format.

WeSay - Need

Around the world, speakers of lesser known languages are eager to develop their own languages. Part of that development will mean collecting stories for publication and developing a dictionary. In many cases, they are limited to working with limited experience with computers.

WeSay - Solution

- Simple and easy to use
- Task oriented
- Available on hardware appropriate to the environment
- Support data sharing
- Empower communities to do their word collection

WeSay - Configuration Tool
