

Bible Search

Logos Bible Software has special ways to search biblical resources, such as bibles, commentaries, and other resources. Start by clicking on the magnifying glass icon, . This opens the **Search Panel**. Next select “Bible” as the search type, as shown below:

Note the search option, “All Bible Text”. If you click on this phrase, you are given the option to narrow your search within “Words of Christ” only, rather than all of the Bible text, as shown below.

The option, “All Passages”, lets you narrow your search to specific books. Examples are “Old Testament”, “New Testament”, “Poetic Books”, and many other options.

The option, “Authorized Version”, lets you pick which Bible, Series, or other collection of biblical resources you can search. The following is an example of what you may see. As you scroll the list vertically, you will see numerous other Bibles listed.
