

Stage 2: Team Checking

The second stage of a translation project involves checking by the team. In this second stage you will use many tools to ensure that you have been consistent in your translation. You will read through your text, work on proper names, Biblical key terms, spell checking, and formatting checks. You will also print out a draft and use a variety of notes: project notes, spelling notes, Biblical terms discussion notes to record your questions, discussions and decisions.

The following modules will help you in this stage:

- [7: PN - Proper Names](#)
- [8: SP - Spell Checking](#)
- [10: BT - A 4-Step process for consistent Biblical Terms](#)
- [13: FC - Formatting checks](#)
- [12: BC2 - Basic Checks](#)
- [14: PD - Printing Drafts](#)
- [15: UN - Using Notes](#)

7: PN - Proper Names

Introduction

In this module, you will check that the proper names have been transliterated consistently. There are two ways to do this. One way is to have Paratext guess the proper names based on statistical analysis of a model text. The other way is to tell Paratext the changes for specific characters.

Where we are

You have (or are working on) the rules for transliterating the names.

Why this is important

You want to be consistent so that is clear who is being referred to in the text.

What you are going to do

You will:

- filter the Major Biblical terms list on Names.
- EITHER use the **Guess renderings** tool to guess the appropriate rendering of the names.
- OR use the **Adapt Names** tool to enter your transliteration rules for each letter.
- edit and approve the individual names.
- add the approved names as proposed names in the Biblical terms list.
- work through the Biblical Terms list to ensure that all the verses are consistent.

7.1: Run the Biblical Terms tool

- Click in your project
- **≡ Tab**, under **Tools** > **Biblical Terms ...**

7.1.1: Open list of terms

- **≡ Tab**, under **Biblical terms** > **Select Biblical terms list**
- Double-click the "**Major Biblical Terms**" list

7.1.2: Choose your reference text as a comparative text

- Click the **Comparative Texts** button on the toolbar.

Comparative Texts

- Choose your reference text, then click → (right arrow).
- Click **OK**.

7.1.3: Change various settings

- Click the second filter button

- Choose **Chapters Assigned to Me**

Note: The terms column is in Greek (or Hebrew) by default. You can see the terms in a roman script by using the **≡ Tab**, under **View** menu > **Transliterate terms**.

7.1.4: Filter for names

- Click the first filter button
- Choose « **New Filter** »
- In the dialog box, under **Categories...**
- Select « **Names** »
- Click **OK**

7.2: Guess Renderings for proper nouns

- **≡ Tab**, under **Tools** > **Guess renderings**
- Click **OK**

Paratext will add renderings to any terms which do not have a rendering (with an orange background)

You will need to approve these renderings (see 7.4)

7.3: Adapt names

Adapting names should be done in the early stages of a translation project, before you have approved renderings of proper names. Otherwise you can use the guess renderings (see above).

- ≡ **Tab**, under **Tools** > **Adapt Names**
- Choose the language of your reference text (e.g. English or français)
The Name Adaptation dialogue is displayed

7.3.1: Enter the changes for the individual letters (or letter clusters)

- In the left pane, fill in the “Adapted Character” column for the individual letters or letter clusters.

7.3.2: Then revise and approve the Adapted Name

- Work through the **Adapted name** column in the right pane.
- For each name, if the adapted name is incorrect, click on the name in the **Adapted Name** column,
- Edit the name and click **OK**
- Once the name is correct, click in the "**Approved**" column.
- Click **OK**.
Paratext 9 will propose a name (in red) in the rendering column of the biblical terms tool.

7.4: Ensure your text is consistent

You need to work through the list and confirm that all the verses use the name consistently.

- Click the name in the top pane.
- Click on a verse in the lower pane which doesn't have the proposed form of the name.
- Click on the Edit link
- Correct as necessary, then click **Close**
- Repeat for each name.

7.5: Add an alternative rendering

- Click the name in the top pane.
- Select the word(s) in your text
- Click on **Add rendering** button or **Ctrl+A**

7.6: Dealing with verses that do not have the name translated

There are times when a verse is correctly translated even though you have not used the name. For example, a pronoun is used instead of the name. In this case you need to tell Paratext 9 that it is correct (that is, deny that the rendering is missing).

- Click the red cross at the left of the verse reference 
The cross turn into green tick (check) with a red cross  .
- If you clicked on the red cross by mistake, click again on the icon 

Note: Paratext 9 does not find names in the introductions, headings, footnotes, captions or glossary. (You could use the Word List to find possible mistakes.)

7.7: Recall

- To transliterate proper names, you **the** ___ list on names.
- Then use the **_ menu and** ___ command.
- After entering the **_ changes then** the adapted names.
- Paratext 9 then enters a ___ rendering for all the names.
- You then work through the list **_ and/or adding renderings and making sure that all verses are** ___.
- You can add a rendering by selecting the text and pressing **Ctrl+ ___**.
- If a pronoun is used you can ___ the rendering by clicking on the .

Answers: filter, Major Biblical Terms, names, Tools, Adapt Names, character, approve, proposed, correcting, consistent, A, deny

8: SP - Spell & Checking

Introduction

This module explains how to check for spelling mistakes in the text you have typed into your project in Paratext 9.

Where we are

You have typed your text in Paratext 9 and have done some checks but there may still be spelling mistakes in the text.

Why is this important?

It is important to correct any spelling mistakes so that your text will communicate clearly.

What you are going to do

- Configure the wordlist to build up a base of correct words.
 - Work through your text with red squiggly lines showing words that Paratext does not know are correct.
 - Work through your wordlist, either correcting mistakes or telling Paratext 9 that the words are correct.
 - Use a variety of checks from the word list.
 - Add a spelling discussion note to words that require further discussion before a correct spelling is decided.
-

8.1: Configure the wordlist

Before you can check the spelling, it is important to have a base of words that are known to be correct. There are three things we can do:

8.1.1: Approve the spelling of common words

In Paratext

- **≡ Tab**, under **Tools > Wordlist**

In the Wordlist

- **≡ Tab**, under **Tools > Approve spelling of common words**
- Enter a number

The number is the number of times the words must appear to automatically mark it as being spelled correctly. The default is 100 but you can choose more (if you have doubts about the text) or less (if you are confident about the accuracy of the typist).

- Click **OK**
- Click **Yes** (to confirm that you cannot undo)

8.1.2: Check the words that Paratext thinks are incorrect

In the Wordlist (**≡ Tab** under **Tools > Word List**)

- **≡ Tab**, under **Tools > Spell Check > All checks**
A list of words is displayed.
- Click on a word in the top pane.
- If the word is correct - click the green checkbox  at the top of the column
- If the word is incorrect, but Paratext 9 has suggested the correct word, then click the blue link for the correct word.
- If the word is incorrect, and Paratext 9 hasn't suggested the correct word, click on the red checkbox  and correct the word. (See 9.3)

8.1.3: Check similarly spelled words

In the Wordlist

- ≡ **Tab**, under **Tools** > **Find Similar Words**
- Enter letters which sound alike separated by `/' (e.g. `s`/'sh`/'z`)

Depending on your language, tick or untick “Ignore all diacritics when comparing words”.

- Click **OK**
A list of words is displayed.
- Correct the words (as described above).

8.2: Spell checking - from the text

In Paratext

- ≡ **Tab**, under **View** > **Display spelling**

A progress meter is displayed initially, then all the words that are either unknown or incorrect have red squiggly lines underneath.

8.2.1: Making corrections

Paratext 9 will underline in red the words that have not been approved in the word list. This either means that the word is misspelled or unknown.

- Right-click a word which is underlined in either red or grey
A dialogue is displayed

- Either type the correction in the box or select the correct word from the list
- Click **OK**

When possible, it is better to use the spelling check even when making minor corrections as Paratext 9 will remember the

correction and you can apply the correction if it happens again.

When there is more than one correction, a dialog box is displayed. Choose as appropriate:

Yes = changes this verse and looks for the next

No = skips this verse and looks for the next

Yes to all - is too dangerous, DON'T use it

Cancel = stops further changes

-

8.3: Spell checking - current book

- ≡ **Tab**, under **Tools** > **Spell Check Current Book**
A window appears with a list of some words in the current book.

- Make corrections as explained above (9.3)
- Click « More items available » to see additional words.
- Continue as needed.

-

8.4: Spell checking - from the wordlist

8.4.1: Using the checks

In the Wordlist

- ≡ **Tab**, under **Tools**> **Spell check** >
- Choose the desired check (see descriptions below)

A list of words is displayed.

- Make the corrections as needed.
- Click "**More items available**" to see more words.
- Continue as needed.
- When the list is finished, a message is displayed

- Click **Yes**.

8.4.2: All checks

This runs all of the checks. This is very useful as it will find all types of errors especially words with multiple types of errors.

8.4.3: Missing Capitals

- A list of words is displayed which have capitalised forms but are not always capitalised (that is both forms are used). The list shows the word with a lower case, then the capitalised form below it, which has a blue link to the word

- Click the blue link to the capitalised form

- Click the appropriate blue link.
- *Show incorrect* (to see the verses)
- *The two forms are acceptable* (to accept both forms)
- *Capitalise All* (to correct all the words)

8.4.4: Single Character Typos

A list of words is displayed with links to other words which are similar but only have one letter different.

8.4.5: Unusual Letter Combinations

A list of words is displayed which have unusual combination of letters (such as consonant or vowel clusters ...).

8.4.6: Diacritic Errors

A list of words is displayed with links to other words which are the same except for the diacritics.

8.4.7: Common Typos

A list of words is displayed which have the same type of problem which have already been corrected in other words. E.g. if you have already corrected "teh" as "the", and it finds "tehm" it will suggest "them".

8.4.8: Unknown Morphology

A list of words is displayed which the computer has not been able to guess the morphology based on other words.

8.4.9: Find incorrectly joined or split words

In the Wordlist (= **Tab**, under **Tools** - Wordlist)

- = **Tab**, under **Tools**> **Find Incorrectly Joined or Split Words**

- Type in any punctuation which can be in the middle of a word e.g. - '
- Click **OK**

A list of words is displayed with similar words grouped together.

8.4.10: Correct a word which was incorrectly marked

- Find the word in the list (using the filter if necessary)
- Click on the line to see the word in context
- Click the correct spelling status.

8.5: Spelling discussion note

- Double-click on the note icon (in the first column)
- 
- Type in the note
- Assign the note as necessary.
- Click **OK**.

9: GL - Glossary

Introduction

This module explains how to add entries to the glossary using the **Biblical terms** tool.

Where we are

You have drafted and entered your text in Paratext 9. Now you will add some glossary entries to explain some of the terms.

Why this is important

It is good to have a list of important words and their explanations so that the readers can understand the text well. Rather than typing directly into the glossary, it is better to use the **Biblical terms** tool as it keeps the Glossary in alphabetical order. The tool also keeps track of the changes to the glossary.

What you are going to do

You will use the Biblical terms tool to add a rendering for the term and then use the glossary tab to enter the citation form and the definition.

There are four training videos available on adding, linking and editing glossaries. P9 1A.4a-d.

9.1: Open the Biblical Terms tool

- Move to a verse which contains the term you want to add to the glossary.
- Right-click and choose "**View Biblical Terms**", then "**Current Verset(s)**"
- Check that you have the correct list open (e.g. your project list or the NT Key Biblical Terms [SIL])
-

Terme	Catégorie	English	Fréquence	Trouvé	Renderings (PTP)
★ Ἀαρών	Name	Aaron - the elder broth...	5/5	✓	Aaron
★ ἀββά	Beings	abba; father - (title for ...	3/3	✓	Papa Daddy

★ Ἁγάρ		Hagar - the handmaid ...	2/2	✓	Hagar

PTP: Project Biblical Terms

PTP - Paratext Comparative texts

All terms New Testament Find English Type Français/French

PTP RSV NLT07

love aloha

✓ MAT 24:12
Goin get mo an mo peopo dat goin erytime broke da Rules From God mo an moa, az why plenny peopo no goin get aloha fo each odda no moa.

✗
And because wickedness is multiplied, most men's love will grow cold.

✗
Sin will be rampant everywhere, and the love of many will grow cold.

✓ LUK 11:42
"Bummas you Pharisee guys! You goin get it! You guys give God ten percent a eryting, even da mint, an da rue spice, an all da odda kine herbs. But same

✗
"But woe to you Pharisees! for you tithe mint and rue and every herb, and neglect justice and the love of

✗
"What sorrow awaits you Pharisees! For you are careful to tithe even the tiniest income from your herb

291 of 328 terms shown Expected in 105 verse(s): found in 104, denied in 1, missing in 0 Match based on stems: OFF

- To change the list, from the **≡ Tab**, under **Biblical terms** menu choose **Select biblical terms list**

9.2: Add an entry

- Double-click on the term in the list in the top pane
- Click the "**Glossary**" tab

- Type the citation form of the term (i.e. the way you want it in the glossary) [1]
- Type the Definition [2]
- Click **OK**
The word(s) and the definition will be added to the glossary in alphabetical order.

9.3: Link an existing entry

If the word is already in the glossary, you can link a biblical term to the existing entry in the glossary. Later in stage 6 you will link the biblical term to the text to add the * in the printed text or the link in the electronic app.

- From the **Biblical Terms** tool
- Check that you have the correct list open (e.g. your project list or the NT Key Biblical Terms [SIL])
- Double-click on the word in the list in the top pane
- Click the "**Glossary**" tab
- Click the down arrow near the citation form [1]
- Choose the entry from the glossary
- Click **OK**

9.4: View the glossary

In Paratext

- Use the navigation bar to change the book

- Choose the **GLO** book

-

9.5: Edit an entry – in the GLO book

In Paratext

- Open the **GLO** book
- Edit the text as normal.

-

9.6: Edit an entry – in the Biblical Terms

- ≡ **Tab**, under **Tools** > **Biblical terms...**
- Double-click on the word in the list in the top pane.
- Click the "**Glossary**" tab
- Edit the definition
- Click **OK**.

-

9.7: Add a Biblical Term

- see the section [10.7: Add a term – from reference text search](#)

-

9.8: Recall

- You open the Biblical Terms tool from the menu.
- The « glossary » tab is on the dialogue. To open this dialogue you -click on the term in the _ pane.
- To view the glossary, you change to the _ book (after Revelation).

Answers: right click, Edit Rendering, double, top, GLO

10: **BT - A 4-Step process for consistent Biblical Terms**

Introduction

The **Biblical terms rendering** window and the separate **Biblical terms** tool are very useful to make sure you are consistent in the use of terms, especially key terms. With many terms over many books this can become quite a task. This module explains a simple 4-step process to make your Biblical Terms consistent. This is a process should be considered part of the translation process and not a check.

Where we are

You are translating a verse in Paratext 9 and you want to see what renderings have already been chosen

for the terms in the current verse and then make sure they are consistent with other verses.

Why this is important

For your readers to understand your text, you need to be consistent in your use of terms. It is a big task to make them completely consistent. If you start from the verse you are translating and work from there the task is more manageable. The goal is to have consistently rendered Biblical Terms and well documented decisions on why changes were made.

What you are going to do

This method boils down to a short list of steps:

1. [A] Find all the ways you have rendered this term, and enter them in the renderings dialog.
 2. [B] Choose which rendering is/are best, and record why it is best.
 3. [C] Document why you rejected the other renderings.
 4. [D] Clean up your translation by making this rendering consistent throughout your translation. (Make Consistent, Standardise, Normalise, Harmonise).
- Repeat with next Biblical Term you find in the Biblical Terms Renderings window.

10.1: Open the Biblical terms rendering window

- Click in your project
- ≡ **Tab**, under **Tools** > **Biblical terms rendering**
- ≡ **Tab** (of the new window), under **Biblical Terms** > **Select Biblical terms list**
- Choose the desired list
- Click **OK**.

10.2: A: Find all the ways you have rendered this term

10.2.1: Find the terms for the current verse

- Is there a tick in the found column?
- If there is a tick, your verse uses the term and you can continue with the next term.
- If not, you need to either correct your text or add the new term you have used (see below).

10.2.2: Add another rendering

If the term you have used needs to be added to the list:

- Select the rendering of the term in your text.
- Copy it (**Ctrl+C**)
- Double-click in the renderings cell.

The edit renderings dialog is displayed.

- Paste (**Ctrl+V**) the rendering in the dialog box.
- Click **OK**.

10.2.3: Find other verses in the current book with the same Biblical term

- Double-click on a word in the **Term** column
The Biblical Terms Tool opens
- From the second filter button choose **current book**

- Add renderings for the term from the verses until the terms in all verses are been identified (see below).

10.2.4: Add renderings from the other verses

- Select the rendering in the verse
- Add the rendering using **Ctrl+A**
- Continue until all terms for those verses have been identified.

10.2.5: Dealing with verses that do not use the term

There are times when a verse is translated without using the actual term. For example, when a pronoun is used. In this case you need to deny that it is an error.

- Click the red cross  to the left of the verse reference link. The red cross turns into a green tick with a small red x 

If you click on the cross by mistake, click  and it will return to .

10.3: B: Identify the best rendering

- Double-click on the term in the top pane.
The edit rendering dialog is displayed listing all the renderings that have been added.
- Decide on the best rendering
- Section, then Cut (**Ctrl+x**) and paste (**Ctrl+v**) it to the top of the dialogue box
- Add * as necessary to combine similar renderings

You can use * in a number of different ways: before the word for prefixes and after the word for suffixes. You can also put an * in the middle of a word. See the guide for more ways of using the *.

10.4: C: Reject all the others

- Select and cut the other renderings.

10.5: D: Document the reason for the change

- Click on the History button
- Type in the reason why the others were rejected and why the first was the best.

- Click **OK**

10.5.1: If you need more than one rendering

You can add more than one rendering if appropriate. It is good to add a back translation in brackets after the rendering. For example,
slave (slave)

guy * work fo (guy that works for)

- Open the Edit renderings dialog box
- Edit the renderings as needed.

10.5.2: Clean up other books (as time permits)

- Change the filter so that all the published books are displayed.
- Clean up verses as necessary.

10.5.3: Add the Biblical terms notes — ongoing discussion

- Double-click on the note icon (in the second column)

?	*	Term	Counts	Found	Category	English	MP6
	★	adelphē	0/26		Beings	sister (in Christ...	
	★	adelphos	298/315		Beings	brother (in Chri...	bruddas* (brothers) brudda (brother)

- Type in the note
- Assign the note as necessary.
- Click **OK**.

10.5.4: Add the decision to the renderings description

- Double-click on the term
- Type the agreed-on rendering in the description field

?	*	Term	Counts	Found	Category	English	MP6
	★	ἀγι					
	★	ἀδελφός					
	★	ἀκρίς					
	★	ἀμαρτία					
	★	Ἀνδρέας					
	★	ἄφεις					
	★	βαπτίζω					
	★	βάπτισμα					
	★	βασιλεία					

Edit Renderings: MP6

Term Rendering Glossary

Term/Definition ἀδελφός --- brother (in Christ) ---
literally: a male having the same father and

Renderings bruddas* (brothers) 1
brudda (brother)
frenz (friends)

Description 2

- Click **OK**

10.6: Add a term - from the source language text

You can create a list of verses for a specific Greek/Hebrew word and then use that list to add the word/phrase to your project Biblical terms list.

- Click in the window with the Source text.
- Right click on a lemma (blue word) in the source language text window

- Choose **Add to project biblical terms for**
- Choose your project
- Edit the gloss if necessary
- Click on the **Advanced** tab
- Edit the terms if necessary
- Click **OK**

- Change to the **Biblical Terms Tool**
- Double-click on the term.

10.7: Add a term – from reference text search

There will be terms which are important for your language and culture that are not in the list. You can add these terms to your project list.

In Paratext

- From your reference text, do a find (using **≡ Tab**, under **Edit > Find**) and search for the term.
A list is displayed showing the verses with that term.

From the list of results

- **≡ Tab**, under **Edit> Add to Project Biblical Terms**, then choose your project

- Edit the gloss if necessary
- Click on the **Advanced** tab

- Type in a name for the term
- Click **OK**

11: MP - Compare a word or phrase

Introduction

In this module, you will search for a word or phrase in a project and compare it with the translation of that word or phrase in another project.

Why this is important?

In Paratext 9 (and above), you can see where a word or phrase is found in one project and compare it with the equivalent word or phrase in one or more other projects. For example, you can see where "roi" is found in a French project and compare it with "rey" in a Spanish project.

You will

- use the checklist "Word or Phrase" from both the text and also from the Biblical Terms Tool.
- change the settings and comparative texts
- type the word or phrase to compare for each project

11.1: Compare a word of phrase - from the text

- Click in the project that you want to compare
- From the **≡ Tab**, under **Tools**, point to **Checklists**, and select **Word or Phrase**.
The Parameters dialogue is displayed.

- Enter the word or phrase that you want to see into the textbox for each project of the dialogue
- Click **OK**
A window is displayed.

- Click **Comparative Texts...**
- Choose the texts that you want to compare and click **OK**.
The « Settings » dialogue is displayed.

- Type the word of phrase that you want to compare in the textbox for each of the projects, then click **OK**.
*A window is displayed with a button "**Hide matches**" on the toolbar.*

- Click on the "**Hide matches**" button to show only those references where there are differences.
The list shows the verses which contain matches in only one of the projects. The word or phrase is highlighted in light blue.

11.2: Compare using a Word of Phrase from the Biblical Terms tool

- In the Biblical Terms tool
- Choose a term which has a rendering
- Click on the tool icon

The Setting dialogue is displayed with the rendering filled-in.

- Type the word or expression for the other projects
- Click **OK**

12: **BC2 - Basic Checks**

Introduction

In this module, you will learn to do several other basic checks (**Characters, punctuation, capitals, and repeated words**). As in the first Basic Checks module (5: [BC1 - Basic checks](#)), it is easiest to run these checks from the project plan. However, if you want to check several books, you will need to use the **Verification** menu.

Where are we?

You have typed your translation in Paratext 9. Be sure that you have checked the chapter/verse numbers and markers, as described in 5: [BC1 - Basic checks](#), before continuing and that your administrator has either completed the setup of the checks or is with you to do the setup now.

Why this is important?

Paratext 9 has eleven **Basic Checks**. In 5: [BC1 - Basic checks](#), you have already seen the first two, chapter/verse numbers and markers. This module will help you to find errors linked to spelling, punctuation, capital letters and repeated words. Even though these errors may not influence the content of the text, correcting them makes the text easier to read.

What we are going to do:

Most of the checks require that an inventory has been completed by your administrator. In this module you will

- Confirm that the setup has been done (or have the administrator do the setup)
- do the Basic Checks
- correct any errors.

12.1: Confirm the setup

Note: Before you can run these other basic checks some form of setup must be done. Some checks require an inventory others require settings. You can do most of the inventories, but only your Administrator can do the settings.

The required setup may be an inventory, some rules or settings.

12.2: Using inventories to setup checks

These inventories show what is currently in your text, that is, both the good and the bad. You need to work through the inventory and tell Paratext 9 which elements are correct (valid) and which are errors (invalid).

Once you have finished the inventory you will be ready to do the check.

- From the **≡ Tab**, under **Tools > Checking inventories** menu, choose the appropriate inventory (for example Character inventory).
- Click on an item in the list in the top pane.
The verses are shown in the bottom pane.
- For each item in the top pane, choose either **Valid** or **Invalid**.
- Repeat for each item.
- Click **OK**.

Note: Instead of using the mouse, you can use **Ctrl + y** to mark an entry as **Valid** or **Ctrl + n** to mark an entry as **Invalid**.

12.3: Characters

This check (and inventory) helps you identify all the incorrect characters, i.e. the characters which are not in your alphabet.

Setup required

- **≡ Tab**, under **Tools > Checking inventories > Character inventory**
- For each item, choose **Valid** or **Invalid**.

Check

- **≡ Tab**, under **Tools> Run Basic Checks**
- Check "**Characters**"
- Click **OK**.
A list of errors is displayed.
- Make any corrections as needed.

12.4: Punctuation

Identify all the incorrect or misplaced punctuation marks. (Use the Unicode character column to clearly identify the punctuation.)

Setup required

- **≡ Tab**, under **Tools > Checking inventories > Punctuation Inventory**
- Check each punctuation mark in its context.

The contexts can be: **word initial**, **word medial**, **word final** or **isolated** (space before and after).

Punctuation Inventory: MP6				
Punctuation	Unicode value	Valid	Count	Context
'	0027	?	1	Word Medial
/	002F	?	14	Isolated
-_	002D	?	16	Word Final
_ [005B	?	17	Word Initial
] _	005D	?	17	Word Final
_ {	007B	?	43	Word Initial
} _	007D	?	44	Word Final
_ &	0026	?	74	Word Initial

- Click **OK**.

Check

- **≡ Tab**, under **Tools** > **Run Basic Checks**
- Check « **Punctuation** »
- Click **OK**.
A list of errors is displayed.
- Make any corrections as needed.

12.5: Matched Pairs

Setup required

- **≡ Tab**, under > **Unmatched pairs of punctuation**:
- If the list is empty, then there are no errors.
- If necessary, click **Options...** to add other pairs

Check

- **≡ Tab**, under **Tools** > **Run Basic Checks**
- Check « **Unmatched pairs of punctuation** »
- Click **OK**.
A list of errors is displayed.
- Make any corrections as needed.

12.6: Repeated words

Setup required

- **≡ Tab**, under **Tools** < **Checking inventories** > **Repeated words inventory**:
- For each item, choose **Valid** or **Invalid**.

Check

- **≡ Tab**, under **Tools** > **Run Basic Checks**
- Check « **Repeated words** »
- Click **OK**.

A list of errors is displayed.

- Make any corrections as needed.

-

12.7: Capitalization

Setup required

- **≡ Tab**, under **> Tools < Checking inventories > Markers Missing Final Sentence Punctuation**
- For each item, choose **Valid** or **Invalid**.
- **≡ Tab**, under **> Tools < Checking inventories >> Markers followed by a lower case letter**
- For each item, choose **Valid** or **Invalid**.
- **≡ Tab**, under **> Tools < Checking inventories >> Punctuation Followed by a Lower Case letter**
- For each item, choose **Valid** or **Invalid**.
- **≡ Tab**, under **> Tools < Checking inventories >> Mixed Capitalization**
- If you have lowercase prefixes, click **Options** and enter the details.
- For each item, choose **Valid** or **Invalid**.

Check

- **≡ Tab**, under **Tools > Run Basic Checks**
 - Check **« Capitalization »**
 - Click **OK**.
- A list of errors is displayed.*
- Make any corrections as needed.

-

12.8: Making minor corrections

It is possible to make minor corrections from within a displayed inventory. However, if there are several errors it is best to run the check to make the corrections.

- Click on a verse in the lower pane
- Hold the **Shift** and double-click
- Make the correction
- Click **OK**.

In some cases, it is preferable to use the Wordlist or the spell checker to several errors at once.

12.8.1: Review

There are many basic checks in Paratext 9. The table below summarizes the setup needed for each of the checks.

	Check	Setup
Chapter/verse numbers	none	

Markers	Marker inventory
Characters (Combinations)	Character inventory
Punctuation	Punctuation inventory
Capitalization	4 inventories Markers Missing Final Sentence Punctuation Markers followed by a lower case letter Punctuation Followed by a Lower Case letter Mixed Capitalization
Repeated words	Repeated words inventory
Unmatched pairs of punctuation	Unmatched pairs of punctuation inventory
Quotations	≡ Tab , under Project Setting > Quotation rules
Numbers	≡ Tab , under Project Setting > Number settings
References	≡ Tab , under Project Setting > Scripture reference settings
Quoted text	none

It is possible to run all the checks at the same time, however when running the checks for the first time it is better to run them one at a time to avoid large list of errors.

13: FC - Formatting checks

Introduction

In this module, you will find and correct formatting and layout errors.

Where we are

You have typed your draft into a project in Paratext. You will use the checklists to find and correct errors related to the formatting and layout errors.

Why this is important

A New Testament contains more than just chapters and verses. There are also titles, section headings, and several types of paragraphs. These checks allow you to be sure that the layout of your text is correct, and your titles etc. are consistent.

What are you going to do?

You will use the checklists to

- compare your titles and section headings
- check your paragraph breaks
- compare the paragraph markers in your text with those of your reference text
- add markers for special text formatting.

13.1: Using the checklists - generic

There are a number of checklists which differ slightly but they have the following in common:

How to display the checklist

- ≡ **Tab**, under > **Tools** > **Checklists** > choose the desired list
- Add a comparative text (if desired) by clicking on the Texts button. **Comparative text** button
- Select the verses/books (as necessary) using the **Select range**

Making corrections

- Click the Edit link to correct any errors
- Click on the reference link to see more context

Close the list

- When you have finished with the list, close it by clicking the X at the top right corner of the window.

13.2: Using checklist - Section headings

- ≡ **Tab**, under > **Tools** > **Checklists** > **Markers**

Check that

- the headings are consistent with your reference text (length, grammar, style))
- all headings start with a capital
- there is not punctuation at the end
- they are not too long

13.3: Paragraph breaks

- ≡ **Tab**, under > **Tools** < **Checklists** > **Markers**
- Choose your reference text as the **comparative text**
- Click **Settings**

- Type the paragraph makers to be displayed (e.g. p m)
- Click **OK**
- Make any corrections by clicking on the blue Edit link.

OR

- Click on the blue verse reference link.
 - Make any corrections in Paratext.
 - Return to the checklist by clicking on the icon on the taskbar.
-

13.4: Layout and indents

- ≡ **Tab**, under **Tools > Checklists > Markers**
- Choose your reference text as a comparative text.
- Click **Settings**

- Type in the markers to check.
 - Click **OK**.
 - Look for passages that have been formatted with different markers such as q1 and q2
 - Make any necessary changes (see below).
-

13.5: Add USFM to format special text

- See the list of passages with special formatting Appendix A.
- Add the USFM as necessary (see module KD or help if necessary).

14: PD - Printing Drafts

Introduction

In this module you will learn how to print a draft of your translation for checking and revising.

Where we are

You have entered and checked your translation in Paratext 9 and are now ready to print out a copy. Your project must be registered before you can print.

Why this is important

It is much easier to revise and check your work on paper than on the computer. You can also give it to more people if it is on paper.

What you are going to do

You will first produce a PDF version of your translation, which you can print or share with others (including non-Paratext users). If necessary, you can copy the PDF file onto your USB stick and take it to a computer with a printer.

14.1: Create a PDF file

Make sure you have completed the markers check before printing a draft.

- **≡ Tab**, under **Project > Export Draft PDF**
- Check that your project is selected.
- Choose which book(s) and chapters or priority to print
- Choose the page settings as follows:
 - Page size:
 - `210mm, 297mm (A4)` or
 - `148mm, 210mm (A5)`
 - Columns: `1`
 - Margins:
 - `25 mm` (for A4) or
 - `12 mm` (for A5)
 - Text body font: `Charis SIL` (or `Charis SIL Compact`)
 - Size: `10 (or 11)`
 - Line spacing:
 - `1.0 (for single spacing)`
- Click on the **Advanced** tab
- Choose the fonts
- Choose what you want in the **Running header** (the text at the top of the page).
- Check **mirror layout on odd and even pages**
- Make any other choices as needed.
- Click **OK** and wait, the file will open in your PDF reader.
*If there are marker errors, a message box will appear. Click **No**, then correct the errors and try again.*

Note: The first time you print a draft it takes a long time collecting information on the fonts. But it will be much quicker the next time.

14.2: Print a PDF

In Adobe Reader

- (Make sure the PDF file is open.)
- **File > Print.**
- For A5
 - Choose **Booklet**
 - Orientation: portrait (for newer printers or landscape for Win7)
- To print double-sided

If you want to follow a punctuation system (such as French) and have spaces automatically inserted before complex punctuation, then see a consultant to have changes made to your PrintDraftChanges.txt

14.3: Copy PDF file to a USB stick

Paratext saves the PDF file in the PrintDrafts folder of your project folder. For example, C:\My Paratext 9 Projects\XXX\PrintDraft

There are many ways to copy files. One method is described

below.

- Hold the Windows Key and type **E**
Windows Explorer opens.
- Go to your **My Paratext 8 Projects** folder.
- Double-click on your project folder
- Double-click the **PrintDraft** folder
- Right-click on the desired PDF file
- Choose **Send to**
- Choose your USB stick.

15: UN - Using Notes

Introduction

As you are translating and checking you may want to make comments on various errors or issues. You may also want to record your discussions on key terms and spelling issues. Paratext 9 allows you to record these comments either in the text, the Biblical terms list or the wordlist.

Where we are

You are typing or revising your text, wordlist or keyterms and need to make comments on an issue you have seen.

Attention: Notes and footnotes are very different. Footnotes are printed in the New Testament whereas notes are for questions and comments and are not printed in the New Testament.

What you are going to do

You will:

- add more note types (administrator only)
- create notes in the text using different icons,
- open, edit, and resolve notes
- open a notes list
- filter the list
- print a list of the notes

15.1: Different types of project notes

You can choose from many different icons for your project notes in Paratext 9:

Icon	Name	Restricted	Resolve	Template
	To Do	<input type="checkbox"/>		
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				
				

Tip: Don't have too many icons!

An icon can have four different colours or shapes

Icon	Description	Meaning
	Icon has a border and a yellow background color.	The note has a least one unread comment.
	Icon is red, purple, or light blue.	A project note assigned to you, or to the whole team, or unassigned.
	Icon is gray.	A project note assigned to someone else.
	Icon is gray with a green tick.	A project note with resolved status.
	Icon is a white question mark on the cover of a book.	There is a spelling discussion note for this word. (Wordlist only.)
	Icon is gray with a question mark on the cover of a book.	There is NOT a spelling discussion note for this word. (Wordlist only.)
	Icon is a light blue plus.	A consultant note.
	Icon is a light blue globe.	A global consultant note.
	Icon is a black exclamation point within a red triangle.	There is a Send/Receive merge conflict because two users have made different changes to the same verse.
	Icon is a white arrow on a blue background.	There is a rendering discussion note for this Biblical Term. (Biblical terms window or tool only)
	Icon is gray with an arrow on the cover of a book.	There is NOT a rendering discussion note for this Biblical Term. (Biblical terms window or tool only)

15.1.1: Setup additional note types

(One must be an Administrator)

- **≡ Tab**, under **> Project > Project settings > Project properties**
- Click the **Notes** tab
- Click on the **Add** Tab button
A new line is added.
- Click the icon on the new tag line
- Choose the desired icon
- Type a name for the new note type
- Continue for any other new notes.

15.2: Using notes

15.2.1: Inserting a project note

- Click in the text where you want the note (and select any appropriate text).
- **≡ Tab**, under **Insert > Note**
- Choose the desired tag for the note from the list

- Type the text for the note
- Click **OK**.
An icon is displayed beside the text.

15.2.2: Add comments to an existing note

- Click the icon() in the text

The note opens.

- Type a note
- Click **OK**

15.2.3: Assign a note to someone

- Click the icon (🚩) in the text.
- Type your comments
- Click **Assign to**
- Choose as desired
- Click **OK**

15.2.4: Apply notes to multiple projects

- Open the note from the text
- Click the "**Multiple**" button
- Choose the projects
- Click **OK**
- Click **OK** again to close the dialog box.

15.2.5: Reattach note

- Click the note icon in the text to open the note.

- Click the Reattach Note button (on the toolbar) 🚩
- Select the word(s) to attach it to.
- Click **OK**.

The note is attached to the word(s).

15.2.6: Resolve a note

- Click on the icon (🚩) in the text
- Type another comment if necessary.
- Click the **Resolve** button 
- Click **OK**

15.2.7: Delete notes

- Click the note icon

- Click the small red x
- Click **Yes** to permanently delete you comment.
- If there are more comments, continue to delete the next comment.

15.3: Open a Notes List

When reviewing notes, it is often helpful to see them in a list.

- ≡ **Tab**, under **Tools** > **Notes list**
- Select your project.
- Click **OK**.

A note window opens.

- Adjust the filters as needed.

If the window is blank, then change the filters using the filter buttons on the toolbar (see below).

15.3.1: Notes window toolbar

There are four dropdown boxes on the toolbar

- Notes filter
- Verse filter
- Search
- Sort by [verse, date, assigned to]

15.3.2: Notes list filter

- Click the first button/list
- Choose an existing filter as appropriate

15.3.2.1: Define a new filter

- Click the first button/list
- Choose **New filter**

- Choose the status, tag, person and date as desired.
- Click **OK**

15.3.2.2: Save a filter

- Define the filter as needed.
- Click in the textbox at the top left (1).

- Type a name for the filter
- Click the save icon (2).

15.4: Add comments from a notes window

- Click arrow to expand the note ([Open 2](#) ▼)
The note opens,
- Type your comments in the textbox.

- Resolve or assign the note as needed.
- Click the arrow to collapse the note.

-

15.5: Print a notes report

- Click in a notes window.
- Filter the list as desired.
- **≡ Tab**, under **Project >> Print**
- Choose the printer and any options.
- Click **OK**.
- Close the window.

<-- [Stage 1 - Drafting](#) | [Stage 3: Preparing for the Consultant check](#) -->
