Instructions were given on how to prepare to teach a FLEEx module.

Saturday, February 14

Session 1-3: Preparing FLEEx 8 module

The participants prepared to teach their assigned FLEEx modules.

The FLEEx 8 sessions will be taught by the participants.

Monday, February 16

Sharing

Session 1: FLEEx 8 - Lexicon Edit 1

LO: To be able to add entries.

LO: To be able to find entries.

LO: To be able to merge entries.

LO: To be able to use the help facility.

Lexicon Edit 1

Session 2-3: FLEEx 8 - Lexicon Edit 2

LO: To be able to work with lists.

LO: To be able to add and edit affixes.

LO: To be able to add and edit variants.

LO: To be able to add and edit complex forms

Lexicon Edit 2

Session 4: Regular Expressions

- Participants will revise the RegEx alphabet.
- Participants will identify (and apply) several common RegEx on MDF dictionary databases.

-  [Regular Expressions V2 PowerPoint](#)

-  [Regular Expressions Primer 2 With Answers PDF](#)

Session 5: Assignment

- Write several RegEx to cleanup after a dictionary conversion, in particular remove unnecessary punctuation and reorder fields as necessary.

Tuesday, February 17

Sharing

Session 1: FLEEx 8 - Browse

LO: To be able to select columns to be displayed.

LO: To be able to sort columns.

LO: To be able to filter entry rows.

Browse

Session 2: FLEx 8 - Project Management

LO: To be able to change the properties of a project.

LO: To be able to create a new project.

LO: To be able to backup and restore a project.

Project Management

Session 3: FLEx 8 - LexiconEdit 3

LO: To be able to add a pronunciation to an entry.

LO: To be able to add an example sentences to an entry.

LO: To be able to add a pictures to an entry.

LO: To be able to add a link to an entry.

LO: To be able to add a lexical relation to an entry.

LO; To be able to create a custom field.

Lexicon Edit 3

Session 4: Unicode Conversion

At the end of the sessions, participants will be able to

- Install the SIL Converters 4.0 and their branch tec files.
- Install additional .tec or .map converters
- Convert a Word file to Unicode.
- Convert a LibreOffice file to Unicode.

Unicode Presentation

Session 5: Assignment

- Identify one of several files that need to be converted to Unicode.
- Install the .tec and font files corresponding to that file.
- Convert the file to Unicode.

Wednesday, February 18

Sharing

Session 1: FLEx 8 - Bulk Edit and Word Collection

LO; To be able to use the Bulk Edit facility to make global changes to the lexicon.

Bulk Edit

LO: To be able to add words to the lexicon using semantic domains

Word Collection

Session 2-3: FLEx 8 - Interlinearization

LO: To be able to add text to be interlinearized.

LO: To be able to interlinearize text

Interlinearization

Session 4: WeSay

LO: The participants will know how to create and configure a WeSay project.

LO: The participant will know how to build a word list using the SIL Comparative African Word List (SIL CAWL) in WeSay.

LO: The participant will know how to build a word list using Semantic Domains in WeSay.

LO: The participant will know how to do collaboration in WeSay.

The participants discussed the pros and cons of WeSay.

The participants created a WeSay project using the WeSay configuration tool.

The participants built a wordlist in the WeSay project using SIL CAWL and Semantic Domain features of WeSay..

The participants (in pairs) added to the wordlist in the WeSay project using the collaboration feature of WeSay

Session 5: Webonary

LO: The participants will know how to upload a dictionary to webonary web site.

The presenter demos the web site.

The presenter shows the participants how to upload a dictionary.

Some participants uploaded a dictionary to the webonary site. .

Thursday, February 19

Sharing

Session 1: FLEx 8

LO: To be able to use the parser for parsing words.

LO: To be able to use the word analysis feature

LO: To be able to use the Concordance

Parsing & Concordance

Session 2-3: FLEx 8

LO: To show how to do collaboration between two FieldWorks project on separate PCs.

LO: To show how to do collaboration between a FieldWorks lexicon and a WeSay project

Collaboration

Session 4: DBL

- Observe the process of preparing and submitting a Paratext project to the DBL.
- Perform the Paratext checks to prepare the project
- Observe the process of REAPing metadata.
- Prepare the canon for the project.

DBL Presentation

Session 5: DBL (cont)

- Search the DBL for scriptures already submitted on behalf of your branch.
- Access scriptures on YouVersion.
- Be able to answer questions from members of your branch on what is the DBL.

Friday, February 20

Sharing

Session 1: LSDev Prioritization Process

LO: The participants will have basic understanding of the LSDev prioritization process

LSDev has a new system for prioritizing their software development projects. The process is discussed. The Round 3 results are discussed

The Strategic Value Drivers of the process s presented and explained.

The process of prioritizing the proposals is explained as the presenter experienced it.

The template for submitting proposals is presented

A Cog promotion video is presented.

Session 2: Assignments Review

The four assignments were discussed.

Session 3: Evaluation & Debrief

Evaluations

Debrief
