Session 5: Scripture App Builder

LO:

- Participants will work in pairs to build a Scripture app with text-audio synchronization using HearThis and SAB.

Hook:

- Show video “German Navy”. Explain how important audio is.

Book:

- Open Paratext LT16 and make sure everyone has that project, or another one which they can record a HearThis file.
- Demo HearThis export to SAB with timing files.
- Demo LT16 using ARC Welder

Look:

- Build a Scripture App using a PT Project file (not resource) and HearThis as the audio (quality).
- Use your mother tongue translation if you have it.

Took:

- What are Strengths and Risks for building apps for communities.
